

Application No. 09/743,818
Response to Office Action dated 11/29/2006
January 29, 2007

SEQUENCE LISTING STATEMENT

A replacement paper copy and CRF of the Sequence Listing are being provided herein. These copies of the Sequence Listing are identical. The corrections made in these replacements are described below.

The replacement Sequence Listing corrects SEQ ID NO:4. When the prior replacement sequence listing was filed, the start codon of the sequence was identified as being two codons earlier than identified in the original papers, resulting in an error in the resulting encoded sequence. Appropriate correction has been made, so that the N-terminal SerMet are removed. This is consistent with the application as filed. No new matter is added by this amendment.

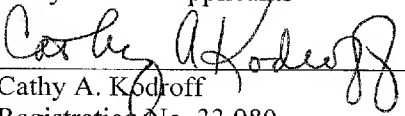

Further, Applicants are adding SEQ ID NO:106 to refer to RAAAG, rather than refer to a fragment of another sequence which contains these amino acids.

No new matter is added by this Sequence Listing. Entry of this Sequence Listing is requested.

This is believed to overcome the objection to claims 115, 118-127 and 135 as failing to comply with the sequence rules.

The Director of the U. S. Patent and Trademark Office is hereby authorized to charge any deficiency in any fees due with the filing of this paper to Deposit Account No. 08-3040.

Respectfully submitted,
HOWSON AND HOWSON
Attorneys for the Applicants
